11.	<p>If the PO line is quantity-based (number of coffee mugs, etc.) adjust the <b>Receipt Qty</b> field to reflect the quantity of goods received that are <u>OK to pay</u>. For example, if 12 mugs were ordered and only 10 arrived, input 10. If 12 mugs were ordered and 12 arrived but 2 were broken, input 10. Only input the quantity for which CUNY should make payment.</p> <p><b>Note that the Receipt QTY field is blank when you first enter the page. CUNY conducts “blind receiving” which means the user is not presented with a default quantity.
