Connecting to the Cisco AnyConnect VPN for Apple Mac

This page provides instructions on how to install and connect to the Cisco AnyConnect VPN for Apple Mac running OSX 10.5 and above.

The Cisco AnyConnect VPN client is a web-based VPN client that provides a secure method of accessing Lehman College computing resources.

1. **Open Web Browser and enter the URL** [https://vpn.lehman.edu](https://vpn.lehman.edu)  
   Enter your **Lehman ID Username and Password**

2. **Click on Start AnyConnect** and wait for it to load.
3. Check the box I accept the risk and want to run this application and click Run.

4. Click Don’t Block and wait for it to load.
5. Enter your **Lehman ID Username and Password** when prompted.

6. You should see the AnyConnect icon after successful log in.

**Disconnecting from the Cisco AnyConnect VPN Client**

Click on the AnyConnect icon, the click disconnect.

**Reconnecting to the Cisco AnyConnect VPN Client**

You can reconnect to the Cisco AnyConnect Secure Mobility client using two different methods: Log in at [https://vpn.lehman.edu](https://vpn.lehman.edu), click Start AnyConnect.

Or
Click on the **AnyConnect** icon, then click connect.
