Configuring Windows 7 on Wireless Network

From the task bar select the **Network Icon**

![Network Icon](image)

Click on **Open Network and Sharing Center** at the bottom of the window

![Open Network and Sharing Center](image)

Click on **Manage wireless network** from the menu on the left side of the screen

![Manage wireless network](image)

Select **Manually create a network profile**

![Manually create a network profile](image)

Fill in the following [as shown]:
- Network name: **lehman_college**
- Security type: **WPA2-Enterprise**
- Encryption: **AES**

Check the box for **Start this connection automatically**

Click **Next**

![Change connection settings](image)

Select **Add**
Click the security tab at the top of the page, and then select the **Settings** button in the center-right of the window

Uncheck the **Validate server certificate** box at the top of the screen

Select **Configure** in the lower right corner

Place a check in the **Specify authentication mode** box

Click on the drop down menu and select **User authentication** and **OK**

Enter your **Lehman ID Username** and **Password** and click **OK**

Uncheck the **Automatically use my windows logon name and password.**

Click **OK**.

Select the **Advanced Settings** button

Your Windows 7 computer is now connected to the wireless network

**Connections will remain for three hours**

After three hours – or if there is inactivity for 30 minutes – you must log in again
