

Swivl: Editing Videos

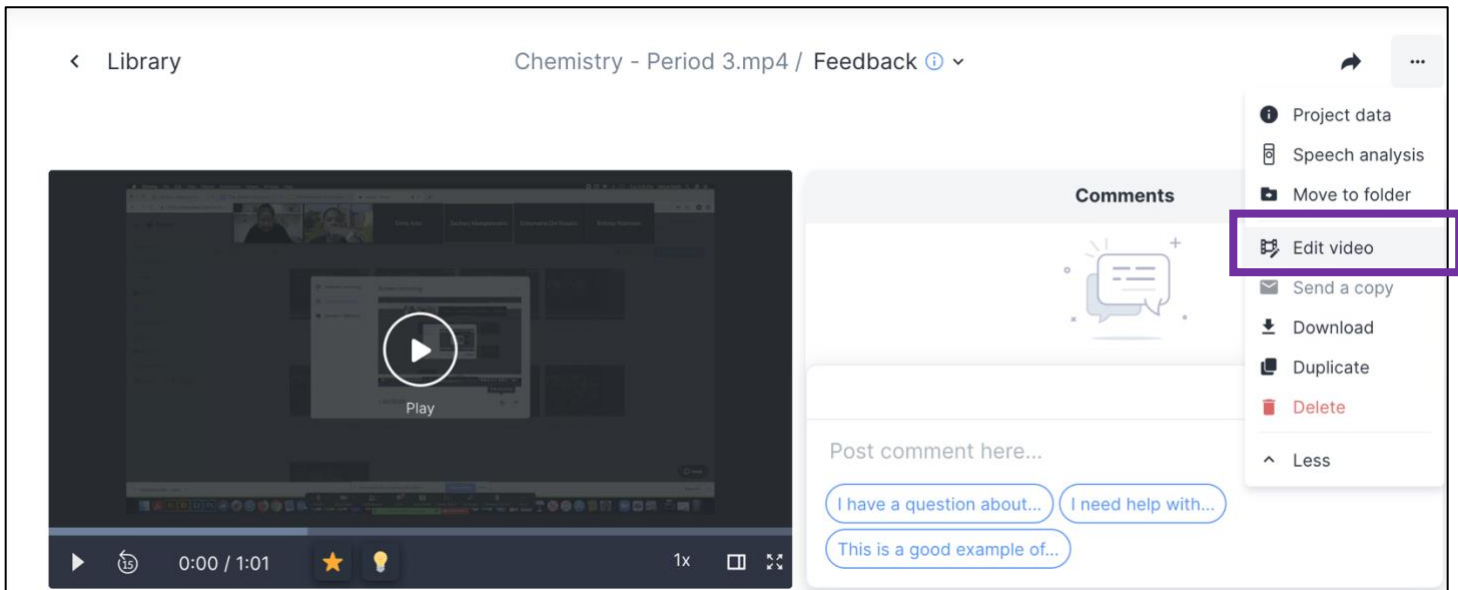

Log into your Swivl account > Library > Select the video you want to edit

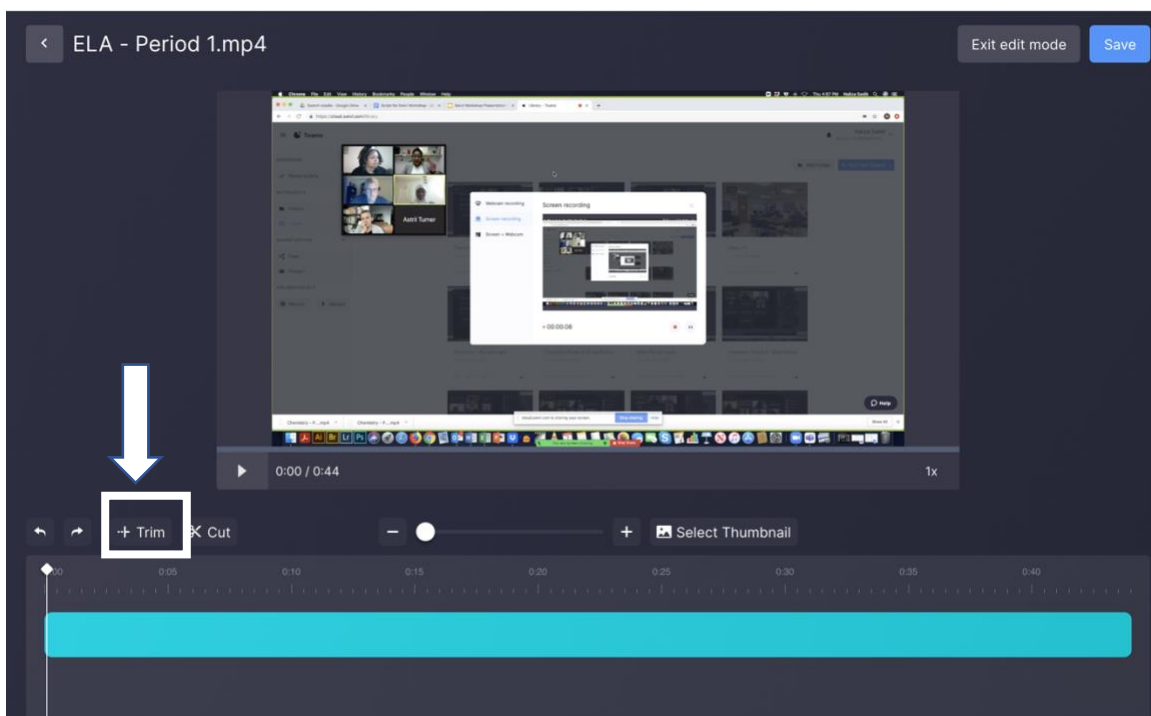

> Click the three dots on the top right-hand corner > More

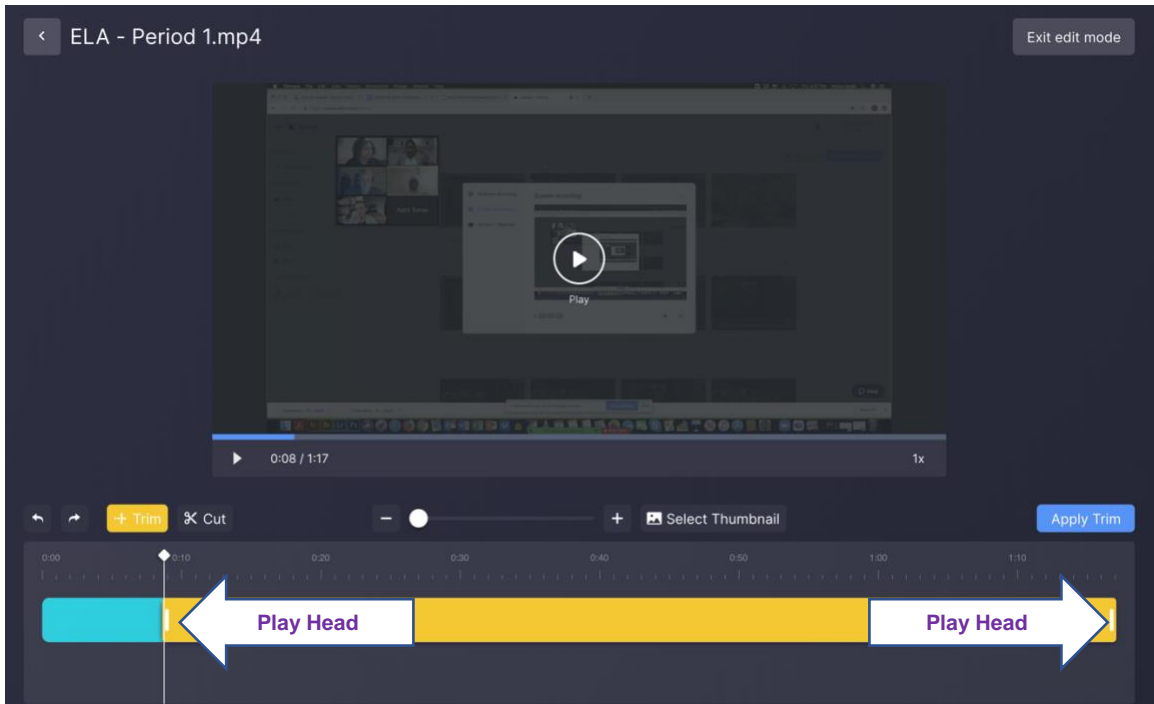

> Select Edit video

> Click Trim

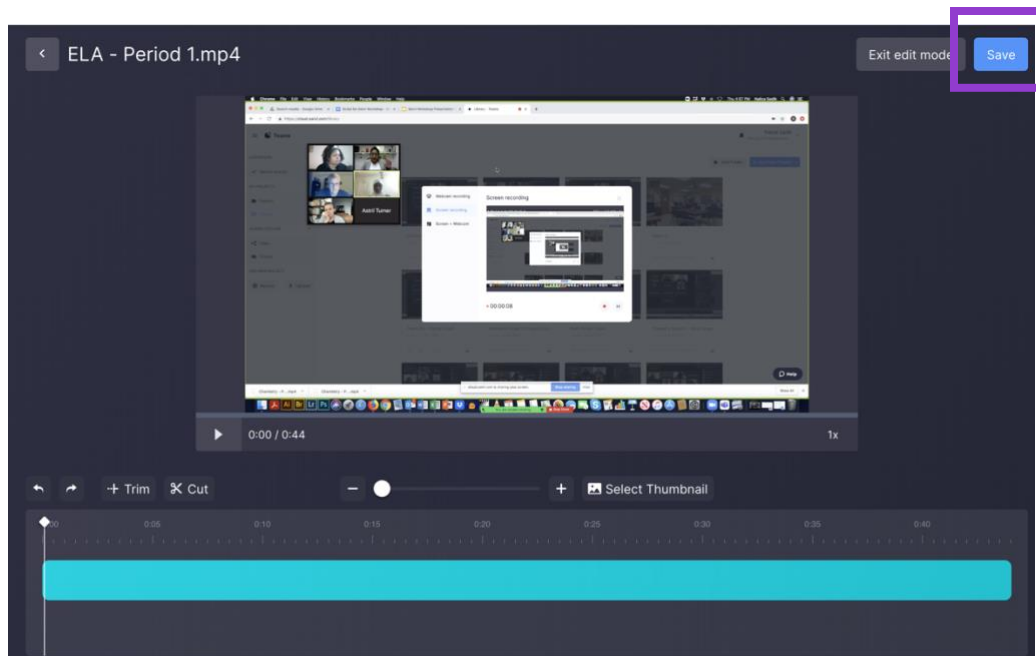

> Drag play head to chosen start and end points

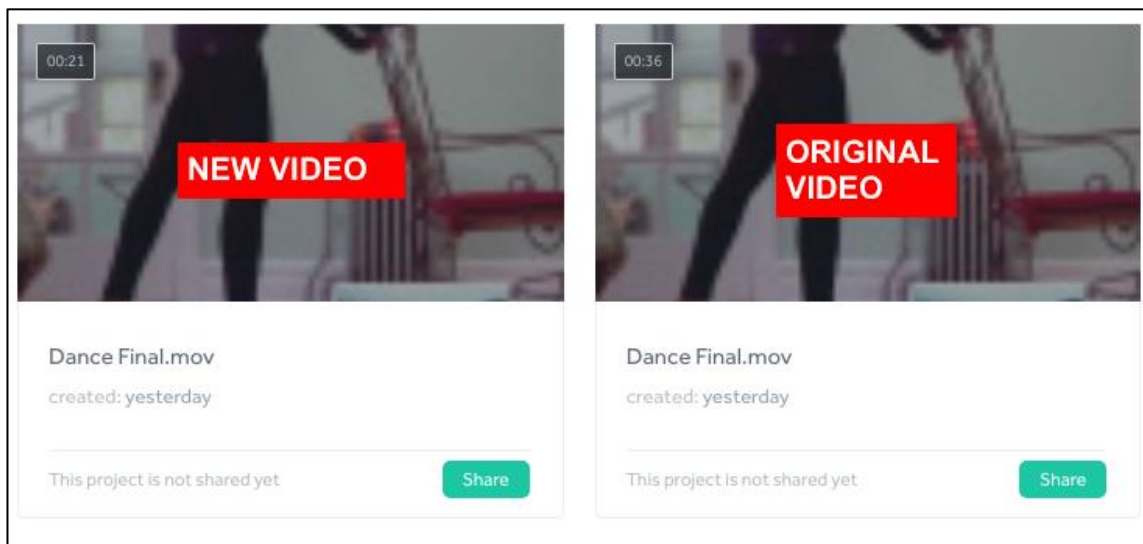

> Click Apply Trim

> Click Save

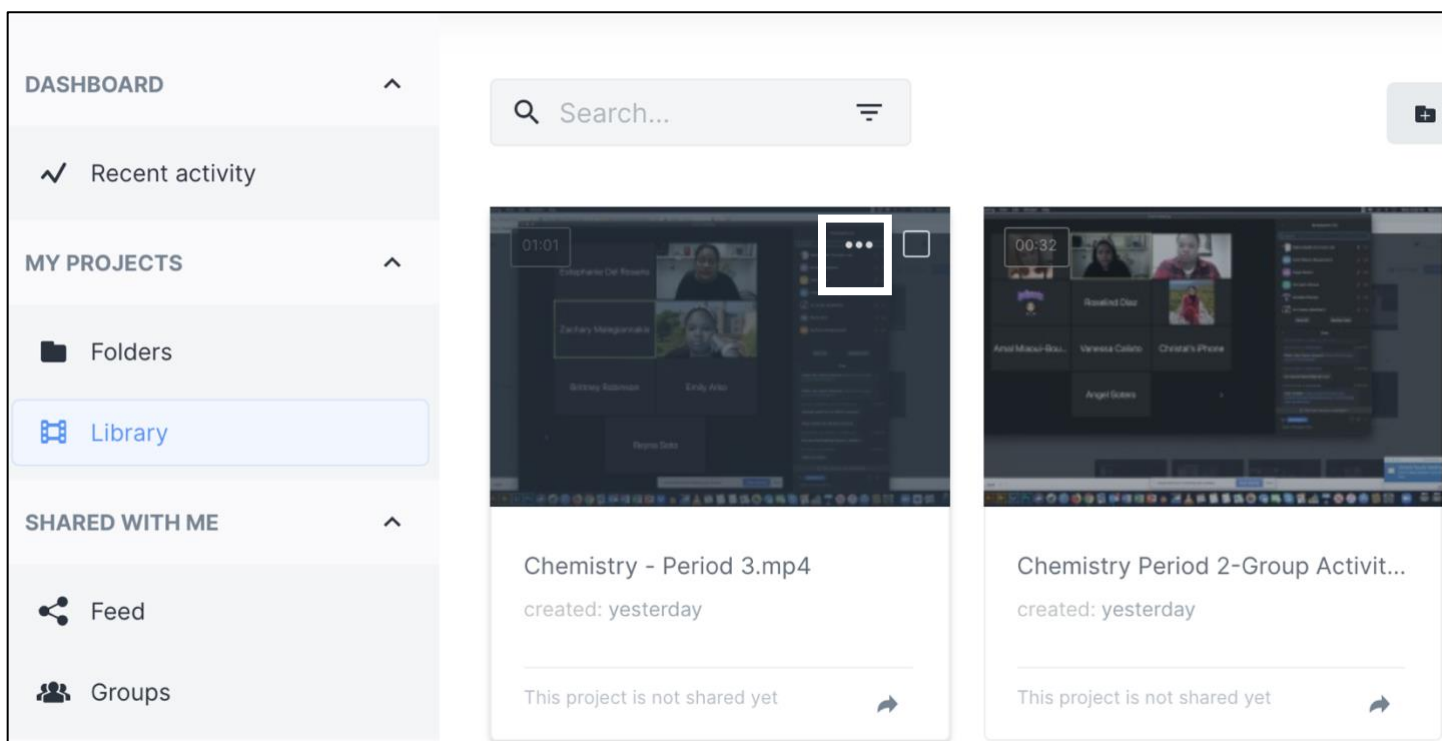

Your original video and new video will be saved in your library.

Both the full-length original video and the new video will have the same title. Highly recommend renaming the new video.

To Rename Video: Library > Click on the three dots on the video thumbnail

> Edit > Add new name > Save
