

May 1, 2019

Dr. Juliana Maantay
Professor of Urban Environmental Geography
Director: Geographic Information Science (GISc) Program
Dept. of Earth, Environmental and Geospatial Sciences
Lehman College, City University of New York
250 Bedford Park Blvd. West
Bronx, NY 10468

Dear Dr. Maantay,

The Commission on Affiliation of PSM Programs reviewed the application you submitted for PSM re-affiliation and would like to recognize the Professional Science Master's in Geographic Information Science. Your program meets the guidelines established by the Commission on Affiliation of PSM programs, and you are granted affiliation status from May 1, 2019 through April 30, 2024. We appreciate your long commitment to the PSM program and the PSM community. Your next affiliation application will be required to be submitted before April 30, 2024 to ensure that the program maintains continuous affiliation. Please note that your program will continue to receive annual invoices that include NPSMA academic membership dues.

Notice of Affiliation and Sciencemasters.com Listing: Please download the official PSM logo from the <https://www.professionalsciencemasters.org/resources> and add it to your program website.

We encourage you to use the official PSM logo on all of your promotional materials. In any mention of PSM affiliation, please include the phrase that the program “has been approved for affiliation as a PSM degree by the Commission on Affiliation of PSM Programs.”

Your program information is listed on our website. Please let us know if your program contacts and links to your program website have changed. We will update your page on our website.

Promotional Materials: The Commission on Affiliation of PSM Programs has developed promotional flyers regarding the PSM - one directed toward students, one for employers, and one for policy makers (e.g. legislators). You can download these flyers from the Commission on Affiliation of PSM Programs website at the following URL: <https://www.professionalsciencemasters.org/resources> and/or we can provide the InDesign templates for you to personalize the flyers to your program.

Other support and resources: There are many benefits of PSM affiliation. In addition to the support for your PSM program provided by our office, the National Professional Science Master's Association (NPSMA) is a membership association that provides materials and support for PSM faculty, administrators and students. The NPSMA serves as the focal point for the collective interaction of the nation's PSM programs with organizations that have a stake in graduate education in science, mathematics, and technology. The NPSMA initiates and encourages these exchanges by holding workshops and conferences, sharing PSM policy developments, and, most importantly, connecting the various constituents of the PSM. Please see <https://www.professionalsciencemasters.org/membership> to find the resources available.
