

The Science of Teaching and Learning: A Human Endeavor

Spring 2024 SNSS Seminar at Lehman College (SC 1405/zoom)

3Ps of Protection, Promotion, and Preservation: Centering Anti-Racism and Cultural Assets in Children's Healthy Development

Race, place, and zip code should not determine one's opportunity to thrive. However, racism, a multidimensional system of oppression and exclusion, is part of the foundation of the United States and is detrimental to the health and well-being of Black children and other children from historically marginalized communities. Based on the Racism + Resilience + Resistance Integrative Study of Childhood Ecosystem (R³ISE), this lecture highlights how attending to racial equity can be the bedrock of early childhood programs, systems, and other adjacent systems through racial equity and cultural wealth frameworks.
